Mother's Auto & Speed Part's  
1903 S. Stewart  
Springfield, Missouri 65804

Dear Sirs:

Personnel from the City's Water Pollution Control Section made a visual inspection of your property as of the above date. That inspection revealed that a pollutant discharge was occurring from that property, apparently from a parts cleaning operation. The discharge was flowing along the south side of your building and entering a storm sewer intake located in Stewart Street.

Please be advised that such a discharge is in violation of City, State, and Federal Water Pollution Control Laws. Be further advised that these laws carry severe penalties for unlawful discharge of water contaminants; up to ten thousand dollars per day for each day or part thereof the violation occurred and continue to occur.

This office would advise you to cease discharge immediately, and to dispose of such wastes in a proper waste treatment system. This office maintains periodic surveillance within the corporate limits of the City and will be watching this area closely.

Please do not hesitate to call if we can be of assistance in any way.

Yours truly,

Gary J. Pendergrass  
Water Pollution Control Inspector II  
Surveillance & Enforcement
